

# Creamy Potato Soup Recipe

## Ingredients needed:

- ★ Creamy Potato Soup Mix
- ★ 2 quarts water (2 qts. = 8 cups)

## Directions:

Bring water to a boil. Stir in entire package of soup mix. Reduce heat and simmer uncovered 20 to 30 minutes or until potatoes are tender, stirring occasionally. Do not let soup scorch. Salt and pepper to taste. (Yields eight 1-cup servings.) Addition of water may be necessary if soup becomes too thick.

## Smaller Servings:

| Servings | Mix        | Water  |
|----------|------------|--------|
| 2        | 2/3 Cup    | 2 Cups |
| 4        | 1-1/3 Cups | 4 Cups |

Prepare as above.

## For variety:

Add whole kernel corn, cooked sausage, ham, cheddar cheese, broccoli, peas, clams, asparagus or jalapeno peppers.

## Optional:

For richer soup, instead of using 8 cups water, use 4 cups water and 4 cups milk (for a total of 8 cups of liquid).
